H.F. Lenz Company Names Three New Associates

May 2, 2008, Johnstown, Pennsylvania. H.F. Lenz Company has named David A. Blackner, P.E., Scott A. Mack, P.E., and John M. Weiland, P.E., as Associates of the Company.

David A. Blackner, P.E., joined H.F. Lenz Company in 1998, and has 20 years experience in structural engineering. His early experience with H.F. Lenz Company involved spending 14 months on-site at North American Hoganas, handling the structural engineering design and overall project management for a \$70 million steel mill renovation. He has also provided the structural engineering for numerous large-scale projects including: the Social Security Administration, Mellon Financial Corporation (now known as The Bank of New York Mellon), Conemaugh Memorial Medical Center, Children’s National Medical Center, Washington, DC, and West Virginia University Hospitals (Ruby Memorial Hospital) in Morgantown, West Virginia. Dave is actively involved in the American Institute of Steel Construction and serves as H.F. Lenz Company’s main point of contact for the organization.

Both Scott A. Mack, P.E., and John M. Weiland, P.E., began their careers with H.F. Lenz Company as interns from The Pennsylvania State University Architectural Engineering Program. Scott joined H.F. Lenz Company as a full-time employee in 1995. In 2003 he became a LEED™ Accredited Professional, and was responsible for the mechanical design and LEED™ coordination process for H.F. Lenz Company’s first

LEED™ Certified project, a new childcare center for the Social Security Administration's Main Operations Center in Woodlawn, Maryland. Since that time Scott has been directly involved in numerous projects designed to attain various levels of LEED™ Certification, and has conducted several educational presentations on sustainable design. He currently serves as a Project Engineer for clients including: The Pennsylvania State University, Temple University, the U.S. General Services Administration, the Pennsylvania Department of Conservation and Natural Resources, the United States Postal Service, and the U.S. Army Corps of Engineers.

John M. Weiland, P.E., became a full-time employee of H.F. Lenz Company in 2002, and became a LEED™ Accredited Professional in 2003. John is a Project Engineer for H.F. Lenz Company's Healthcare and Education Team and specializes in mechanical engineering. He was directly involved in the mechanical design of The Pennsylvania State University's New School of Architecture and Landscape Architecture, which has won numerous design awards and recently received a LEED™ Gold Rating. His current projects include the new student housing facilities for Indiana University of Pennsylvania, which is anticipated to include more than 1 million total sq.ft., and is being designed to attain LEED™ Certification. Additional recent projects have included a new science building at Slippery Rock University, and a new 176,000 sq.ft. addition to West Virginia University Hospitals (Ruby Memorial Hospital). John also serves as the Treasurer and the Research Promotion Chair for the Johnstown Chapter of ASHRAE.

H.F. Lenz Company is a 182-person engineering firm headquartered in Johnstown, with branch offices in Erie and Pittsburgh.
