**H.F. Lenz Company's Branch Manager Receives CPMP Certification**

November 5, 2009, Erie, Pennsylvania. John M. Dombrowski, P.E., an Associate of the H.F. Lenz Company and manager of their Erie office, has earned a Commissioning Process Management Professional (CPMP) certification from the American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE). The CPMP certification program recognizes people who manage the commissioning process and ensures that they have the necessary people and project management skills, as well as, a thorough knowledge and understanding of building design, construction, operations, and maintenance as they relate to the total building commissioning process. The purpose of this certification is to help building owners, developers, standards writing agencies, and others assess the capability of individuals who manage the whole building commissioning process. John has been directly involved in the commissioning process of approximately 2 million sq.ft. of facilities for educational facilities, laboratory and research facilities, healthcare facilities and office buildings for both private and public usage. This experience includes new building commissioning, continuous commissioning, retro-commissioning, re-commissioning and LEED® commissioning services. A few of his current projects include the commissioning services for Hamot Medical Center's new 175,000 sq.ft. Women's Hospital in Erie, and Edinboro University's new, \$105 million student housing complex and the Pennsylvania State University's new Metzger Center at the Behrend Campus, both of which are designed to attain a LEED Silver certification.

John established H.F. Lenz Company's Erie office 12 years ago. He has over 27 years of experience in mechanical engineering and, in addition to this certification, he has

also achieved certification as a LEED® Accredited Professional (LEED®-AP) from the U.S. Green Building Council and a Healthcare Facility Design Professional (HFDP) certification from ASHRAE. He is a Licensed Professional Engineer in Pennsylvania, New York and Ohio.

**ADDITIONAL INFORMATION ON H.F. LENZ COMPANY**

H.F. Lenz Company is a Pennsylvania-based, 169-person firm headquartered in Johnstown, with branch offices in both Pittsburgh and Erie. The firm has a strong commitment to sustainable design, which is demonstrated, not only through their Energy Star® Partnership, but also through their extensive experience with the U.S. Green Building Council's LEED™ (Leadership in Energy and Environmental Design) experience. H.F. Lenz Company currently has 21 LEED™ Accredited Professionals on staff, 20 projects that have attained various levels of LEED Certification, and 40 more projects are currently pending LEED Certification (includes design and commissioning projects). H.F. Lenz Company was also recently ranked in the "Top 100 Green Design Firms" in the Country, for the second year in a row, by ENR Magazine (June 2008 & 2009 editions).

H.F. Lenz Company has been commissioning buildings for over 30 years and is a Corporate Provider Firm with the Building Commissioning Association.
